DETAILED ACTION

RE: Garrett et al.

1. The examiner of your application in the PTO has changed. To aid in correlating of any papers for this application, all further correspondence regarding this application should be directed to Examiner Hong Sang, Art Unit: 1643.
2. Applicant's election without traverse of Group III (claims 63 and 64) in the reply filed on 2/13/08 is acknowledged.
3. Applicant is further required to elect a species as set forth in this office action.

Election/Restrictions

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (a) N-terminal end of the CR1 domain, the CR1 domain dimerisation loop (i.e. ErbB2 amino acid residue 247-268, or a subset thereof), the CR1 domain dimerisation adjacent residues, and C-terminal end of the CR1 domain (ErbB2 amino acid residue 294-319 or a subset thereof).

If applicant elects the N-terminal end of the CR1 domain, applicant is further required to elect a single ErbB2 amino acid residue from group (a1):

- (a1) ErbB2 amino acid residue 200-203, ErbB2 amino acid residue 210-213, ErbB2 amino acid residue 216-218, and ErbB2 amino acid residue 225-230.

If applicant elects the CR1 domain dimerisation adjacent residues, applicant is further required to elect a single ErbB2 amino acid residue from group (a2):

(a2) ErbB2 amino acid residue 244-246, and ErbB2 amino acid residue 285-289.

Applicant is required, in reply to this action, to elect a single species from which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: claims 63 and 64.

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features. As indicated in the previous office action, antibodies to ErbB2 are known in the art (see Shak et al., WO 99/31140, IDS).

Art Unit: 1643

Moreover, the recited antibodies have different structures and bind to different amino acid residues.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HONG SANG whose telephone number is (571)272-8145. The examiner can normally be reached on 8:30am-5:00pm.
